EDUCATION | The City College of New York

B.S in Computer Science

Expected Fall 2019

Relevant coursework: Data Structures, Algorithms, Discrete Math, Computer Systems, Software Engineering, Web Design, Cybersecurity, Databases, Machine Learning, Artificial Intelligence

SKILLS & ABILITIES

Programming Languages: JavaScript, Python, C++, Java

Technologies: React.js, Redux, Node.js, HTML, CSS, MySQL, Solr, Docker, TravisCI

Frameworks/Libraries: ESLint, Jest, Flask, Bootstrap, Express, Pandas, numpy, scikit-learn

Operating Systems: MacOS, Linux, Windows

EXPERIENCE

Frontend Developer Intern, Flow Commerce (flow.io)

Feb 2018 – Jan 2019

- Contributed directly to company's production code by fixing bugs and implementing new features to existing products with JavaScript, React and Redux
- Improved a monorepo of packages and dependencies used on frontend development and design such as dropdown functionalities, button styles, search bar suggestions, etc.

Programming Intern, CUNY CiPASS Program

Nov 2017 – Aug 2018

- Produced an Early Access Alert system which sends text notifications and emails to hundreds of college students which was written in Python and using Twilio API
- Maintained four PHP websites used by researchers and suggest UI/UX improvements

Full Stack Developer Intern, pulseData

Jul 2017 – Aug 2017

- Designed a web-based search engine which matches a drug name with its ingredients and known side effects using Pandas, Flask, Solr and SQL
- Optimized search speed within database consisting of more than 2 million rows of data
- Deployed with a custom Docker container into Amazon Web Services

PROJECTS

chrispanican.com, Personal Site

Dec 2016 – Present

- Constructed a personal portfolio-site using HTML, CSS, and JavaScript, while utilizing the Materialized.css framework
- Maintained frequently and features a mobile responsive design

Client Developer Marketplace, cd-marketplace.herokuapp.com

Nov 2017

- Produced an online marketplace for freelance developers who want to showcase their talents to different clients and get paid depending on the quality of their work
- Made using Python Flask framework and MySQL for database

ADDITIONAL ACTIVITIES

JP Morgan Code for Good, Jersey City, NJ

Oct 2018

- Implemented an app which pinpoints plastic bottle recycling machines near the user. The app motivates people to recycle their plastic bottles by participating in a community ranking
- Winner of 1st runner up and chosen by Rare.org as solution to climate and behavior change

CUNY Tech Prep, New York, NY

Jun 2017 – May 2018

- Selected to competitive full stack JavaScript training program that prepares students for careers in software engineering
- Learn in-demand technologies like React and Node + Express and processes for design, implementation, testing, and deployment

Lehman Hackathon, The Bronx, New York

Nov 2017

- Developed a React.js web application that guides new uninformed entrepreneurs by providing information, predicting future spending, and plan future steps
- Won a category award for JP Morgan Best Hack for Empowering Minority Entrepreneurs
